

First Visible Service: a 90-day roadmap

Think big, start small: deliver one high-demand service end to end, measure the results, then scale.

Step 1 · Choose the right first service

Score each candidate from 1 (low) to 5 (high). Start with the highest total that has a named owner.

Criterion	What to ask	Score				
Citizen demand	How many people or businesses use this service each month?	1	2	3	4	5
Pain today	How long are queues, delays and repeat visits right now?	1	2	3	4	5
Clear owner and mandate	Is there one leader with authority to change the process?	1	2	3	4	5
Data readiness	Are the records it needs available and reliable?	1	2	3	4	5
Revenue or savings	Will it collect fees faster or reduce cost per transaction?	1	2	3	4	5
Visibility	Will citizens, leaders and funders notice?	1	2	3	4	5

Strong first candidates

Business registration	Permits and licences	Farmer and subsidy registration	e-Visa and consular appointments
Tax filing and payment	Civil records (birth, marriage)	Investment project registry	

Build these foundations once, reuse them everywhere

Identity and roles One account for citizens and officials.	Payments Online fees, reconciled automatically.	Document vault Secure uploads and e-signatures.
Audit trail Who did what, and when.	Data exchange Citizens never resubmit data.	Assisted channels Agents and SMS for everyone.

The first service is not a one-off project: everything built for it becomes the platform for the next ten.

From selection to a live service

Days 1–15

Align

- Name the executive sponsor and delivery lead
- Agree success measures
- Record today's baseline

Days 16–45

Map and configure

- Map the journey with the people who run it
- Remove duplicate steps
- Configure on shared foundations

Days 46–75

Pilot

- One agency, real users
- Train staff and assisted channels
- Fix friction weekly

Days 76–90

Go live and report

- Launch with support
- Publish the results
- Choose the next services

Change management, training and knowledge transfer run through every phase, so your team can operate and extend the service.

Measure what wins the next budget

- **Processing time**
Days from application to decision, before and after.
- **Cost per transaction**
Staff time, paper and visits saved per application.
- **Adoption**
Share of applications completed online or with assistance.
- **Revenue collected**
Fees received on time, reconciled automatically.
- **Citizen satisfaction**
A short rating after every completed service.

Governance checklist

- ☐ An executive sponsor who unblocks decisions
- ☐ One accountable delivery lead and team
- ☐ Data protection and national data sovereignty agreed in writing
- ☐ A training and knowledge-transfer plan for local staff
- ☐ Continuity arrangements agreed at the outset
- ☐ A public results report at day 90

After day 90: scale with confidence

Each new service becomes a configuration, not a new procurement. Our 365-day National Digital Acceleration Program extends it across ministries.
